Subject: [MAARS] Meeting Chat Dialog
Reply-To: ks0man@googlegroups.com

Below is a copy and paste of the chat dialog for reference just in case you would like to revisit or go to the links that members linked.

from Kurt Zoglmann to everyone:
(As a general note, audio will be improved if everyone mutes except for when they want to talk.)
from Jim Foster to everyone:
Got it. Thanks
from Kurt Zoglmann to everyone:
Sounds like a prudent course of action.
from Bryce K0NYX to everyone:
thats pretty cool Kurt
from Kurt Zoglmann to everyone:
Thanks Bryce. :)
from Kurt Zoglmann to everyone:
Morse Code Ninja — https://www.morsecode.ninja
from Kurt Zoglmann to everyone:
My interview on DitDit — https://www.ditdit.fm/shows/episode-29-morse-code-ninja
from Kurt Zoglmann to everyone:
Yeah
from Kurt Zoglmann to everyone:
Ryan, can you tell us about the learning curve for making good parts?
from Bryce K0NYX to everyone:
Ryan – what software do you use and where do you find open source designs/models to try out/tweak?
from Kurt Zoglmann to everyone:
Have you worked with the resin printers that are becoming more popular?
from PC-HAM to everyone:
Utube has great videos/channels and tutorials
from PC-HAM to everyone:
KB0EOD
from Jim Foster to everyone:
https://creality3d.shop/collections/new-arrival/products/creality3d-ld-002r-uv-resin-lcd-3d-printer?gclid=CjwKCAjwssD0BRBIEiwA-JP5rANBh3AG0SM5gjtM4kwrsJN3xAN9MU4BJbXTW8rEwWiXWYmH4SFitBoCGRgQAvD_BwE
from Bryce K0NYX to everyone:
thanks Ryan
from Kurt Zoglmann to everyone:
Have you open sourced any of your designs?
from Bill-WS0I to everyone:
Nice presentation
from Kurt Zoglmann to everyone:
N0ZHE is my uncle from Conway Springs, KS :)
from Bill-WS0I to everyone:
Anyone interested in a virtual tour of WS0I
from Mike Asbury to everyone:
Yes, most definately
from Bryce K0NYX to everyone:
that would be cool
from PC-HAM to everyone:
Very understanding Wife
from PC-HAM to everyone:
KB0EOD
from Kurt Zoglmann to everyone:
I am actively working on creating additional Morse code content. I have come up with an innovative approach to help operators head-copy letter-by-letter. It is a practice set that has all multi-letter phonemes in the English language, such as CH, NG, STR, etc. It can help recogizing the common letter combinations and also with trying to sound out the word as you copy it. This idea builds off of the CW Academy approach of listening to digraphs and trigraphs.
from Bryce K0NYX to everyone:
thanks Bill, what do you have hooked into wsjtx to trigger the callsign lookup for the auto rotating your beam
from Bill-WS0I to everyone:
I use PstRotatorAz and set it to tracker mode
from Bryce K0NYX to everyone:
cool. ive seen gridtracker has some scripting support
from Bill-WS0I to everyone:
It then interfaces with WSJTx
from Bryce K0NYX to everyone:
gotcha

from Kurt Zoglmann to everyone:
If anyone is interested in learning Morse code, I could talk your ear off.
from Bill-WS0I to everyone:
Only one comment of my Batman mask LOL
from Jim Foster to everyone:
https://microphone-parts.com/pages/mxl-990-mods
from PC-HAM to everyone:
Ryan how much brighter is the displays with new LEDs and how much cooler is it running with new Power Supply KB0EOD
from Kurt Zoglmann to everyone:
I use N3FJP — https://www.n3fjp.com
from Kurt Zoglmann to everyone:
N1MM Logger+ is great for contest logging — https://n1mmwp.hamdocs.com
from Bryce K0NYX to everyone:
thanks
from Bill-WS0I to everyone:
I use the entire DX Lab suite
from Bill-WS0I to everyone:
https://dxlabsuite.com/
from Bill-WS0I to everyone:
I use N1MM for all contests all modes
from Kurt Zoglmann to everyone:
Some peope really like Ham Radio Deluxe for an all in one solution, including logging — https://www.hamradiodeluxe.com
